1 Listening

1.1 Unit 1

1.1.1 Conversation

1. What does the woman normally do in the morning?
 - A. Get up late.
 - B. Drink a lot of coffee.
 - C. Make her work plans.
 - D. **Do physical activity.**
2. What is one advantage of the man's schedule?
 - A. He can arrange more time for social life at night.
 - B. He can have less difficulty coping with meetings.
 - C. **He can enjoy a less distracting work environment.**
 - D. He can be more focused and productive during the day.
3. What do the speakers think determines whether someone is an early bird or a night owl?
 - A. One's sleep quality.
 - B. One's work schedule.
 - C. **One's individual body clock.**
 - D. One's attitude toward morning exercise.
4. What should individuals do regarding their schedules according to the speakers?
 - A. Sleep less to get more work done.
 - B. Change their natural rhythm to match that of others.
 - C. Follow a fixed routine regardless of external distractions.
 - D. **Listen to their body and adjust their schedule accordingly.**

1.1.2 Passage

1. What tasks does the speaker tend to do first every day?
 - A. **The quick tasks.**
 - B. The routine tasks.
 - C. The most urgent tasks.
 - D. The most difficult tasks.
2. What is one of the suggestions for getting one's work done in time?
 - A. Getting up as early as possible to work.
 - B. Being a night owl and working late at night.
 - C. Using emails to improve work efficiency.
 - D. **Making use of one's most productive time of day.**
3. How does the speaker deal with emails now?
 - A. She checks and responds to them constantly.
 - B. She accesses them only during her real work hours.
 - C. She no longer responds to the most trivial of them.
 - D. **She opens her inbox only when it's totally necessary.**
4. What is the purpose of the talk?
 - A. To discuss the importance of email.
 - B. To show how to balance work and life.
 - C. To share some ideas on how to reduce workload.
 - D. **To give some tips on how to work more efficiently.**

1.1.3 Lecture 1

1. What can we learn about verbal behaviors from the lecture?
 - A. **They include both spoken and written language.**
 - B. They ensure that what we say is what we mean.
 - C. They can convey messages about our personality.

- D. They are more complex than nonverbal behaviors.
2. What does paralanguage refer to?
- A. Expressing emotions through writing.
 - B. Making requests with verbal language.
 - C. Using body language to convey meaning.
 - D. **Using voice in particular ways to communicate.**
3. What does the speaker mean by saying "behavior doesn't occur in isolation"?
- A. Behavior makes communication complex.
 - B. Behavior may cause offense to other people.
 - C. **Behavior can be influenced by cultural factors.**
 - D. Behavior plays a vital role in conveying meaning.
4. What is the main purpose of the lecture?
- A. To define verbal and nonverbal behaviors.
 - B. **To illustrate the communicative function of behavior.**
 - C. To explain how context affects the meaning of our words.
 - D. To show how to behave appropriately in different cultures.

1.1.4 Lecture 2

1. What does the American psychologist suggest as the reason for people failing to implement new behaviors consistently?
- A. **Lack of a proper approach.**
 - B. Lack of motivation or willpower.
 - C. The disruption of unhealthy habits.
 - D. Frequent adjustments of the desired goal.
2. What is recommended by the psychologist as a way to lose weight and improve physical health?
- A. Building a better bedtime routine.

- B. Following a strict diet and exercise routine.
 - C. Eating less and doing exercise in the morning.
 - D. **Starting by making small changes like taking short walks.**
3. Which is mentioned as a small step for someone to achieve a career goal?
- A. Taking the time to actively listen to others.
 - B. Being conscious enough to express gratitude.
 - C. **Seeking out mentors to gain guidance and support.**
 - D. Building stronger working relationships with others.
4. Why can the "small steps" approach lead to lasting change?
- A. It can avoid exhaustion and low motivation.
 - B. It guarantees immediate results and success.
 - C. **It breaks down goals into manageable tasks.**
 - D. It reduces the time and effort for achieving an objective.

1.2 Unit 2

1.2.1 Conversation

1. What is one of the things the woman wishes for at first?
 - A. Learning to swim.
 - B. **Finding a well-paid job.**
 - C. Seeing her husband soon.
 - D. Getting married in a big house.
2. What difficulties did the man experience in his life?
 - A. He had a hard time keeping his marriage.
 - B. He got really sick and lost all his valuable things.
 - C. **He lost his job and wealth and was sick for years.**
 - D. He was unable to see his children due to poor health.
3. According to the man, why is true love important for a happy life?
 - A. It helps one value little things in life.
 - B. **It makes couples appreciate each other.**
 - C. It gives people patience in their job search.
 - D. It makes people confident in pursuing their goals.
4. What is the purpose of the man striking up the conversation?
 - A. To tell the woman an interesting life story.
 - B. To teach the woman skills to find a good job.
 - C. To encourage the woman to pursue a happy marriage.
 - D. **To give the woman advice on the important things in life.**

1.2.2 Passage

1. What is predicted about the human population in the next three decades?
 - A. The proportion of 15- to 50-year-olds will decrease slightly.
 - B. The number of people aged 80 and above will increase by about 22%.

- C. **The proportion of people aged 60 and above will increase significantly.**
- D. The number of 12- to 22-year-olds will decrease by more than 420 million.
2. What is one impact of an aging human population on society?
- A. Economic productivity is constantly rising.
- B. The range of healthcare services is expanding.
- C. The pension system will be replaced in the near future.
- D. **The ratio of working-age people to older people is decreasing.**
3. What may be a result of the population changes discussed in the passage?
- A. Instability of housing prices.
- B. **Changes in family structure.**
- C. An increase in property taxation.
- D. A decrease in population mobility.
4. What does human society need according to the speaker?
- A. Strong trade ties between countries around the world.
- B. Effective policies to reduce social and health costs.
- C. **Necessary changes to address the needs of older people.**
- D. Rich resources to maintain the traditional family structure.

1.2.3 Lecture 1

1. What is the most reliable predictor of one's chances of getting age-related diseases?
- A. Year of birth.
- B. **Biological age.**
- C. Chronological age.
- D. Number of body cells.
2. How is biological age measured?
- A. By comparing how old one looks and how old one really is.
- B. By identifying the diseases one has suffered in chronological order.

- C. **By examining biological evidence of one's physical and mental functions.**
 - D. By analyzing the current health status of one's family members and relatives.
3. What does the speaker say about the importance of genetic influence on biological age?
- A. It has not been studied until recent decades.
 - B. It cannot be measured effectively through DNA research.
 - C. **It has been supported by a lot of research in recent decades.**
 - D. It is equal to that of environmental factors and lifestyle choices.
4. What does the speaker say about healthy lifestyle choices?
- A. **They can help reverse one's biological age.**
 - B. They can improve one's exercise routine in the long run.
 - C. They can reduce one's exposure to stressful environments.
 - D. They can benefit the economic status of certain population groups.

1.2.4 Lecture 2

1. What does the speaker mainly talk about?
- A. Distinctions between concrete thinking and abstract thinking.
 - B. Similarities between cognitive skills and formal logical thinking.
 - C. **Features of cognitive development in different phases of adolescence.**
 - D. Definitions of three thinking patterns developed during the teenage period.
2. What does complex thinking focus on during one's early adolescent years?
- A. **Decisions about personal life in school and home settings.**
 - B. Development of a code of ethics and personal relationships.
 - C. Arrangement and order of concrete objects and simple actions.
 - D. Analysis and understanding of other people's ideas and opinions.
3. During which period are children most likely to think a lot about global issues?

- A. Ages 6-12.
- B. Ages 13-15.
- C. **Late adolescence.**
- D. Early adolescence.

4. What does the speaker suggest parents and teachers should do?
- A. Encourage children to focus on their current goals.
 - B. Be patient with children's mistakes in cognitive thinking.
 - C. Give children the freedom to keep their thoughts to themselves.
 - D. **Support the healthy development of cognitive skills in children.**

1.3 Unit 3

1.3.1 Conversation

1. What is one reason that makes Big Sky Park attractive to the couple?
 - A. It is right in their city.
 - B. It is an entertainment park.
 - C. **It has nice trails and camping sites.**
 - D. It's a park with a beautiful city skyline.
2. What problem do they try to figure out about going to the park?
 - A. Where the No. 32 bus stop is.
 - B. What the best route to drive to the park is.
 - C. Whether they can find easy parking for their car.
 - D. **How they can get their camping equipment on the bus.**
3. What will the woman do before their trip?
 - A. Buy a big backpack.
 - B. **Bake a chocolate cake.**
 - C. Order their favorite food.
 - D. Make a detailed trip plan.
4. What does the couple long to do at the park?
 - A. Drink coffee around a campfire.
 - B. Have a leisurely barbecue dinner.
 - C. **Walk together in the beauty of nature.**
 - D. Take a bike ride around the open spaces.

1.3.2 Passage

1. Why should visitors hurry if they want to see the exhibits in the new museum?
 - A. **The exhibition will last for no more than a week.**
 - B. The museum opens only during the holiday season.

- C. The museum workers will soon begin their vacation.
 - D. Large crowds of visitors will come to the unusual show.
2. What is exhibited in the new museum?
- A. Plenty of televisions that look stylish.
 - B. Anything that reflects modern fashion.
 - C. **Beds and sofas that make people feel relaxed.**
 - D. Objects that have brought big lifestyle changes.
3. What is the purpose of the exhibition?
- A. To offer a place to rest in our fast-paced societies.
 - B. **To provide a practical experience for people to think about laziness.**
 - C. To teach lazy people how to change their behavior and lifestyle.
 - D. To show how furniture has changed to meet the needs of modern people.
4. What did the museum's founder advise us to do?
- A. Consider laziness an enemy of work.
 - B. **Slow down, relax, and be lazy for a while.**
 - C. Make efforts to shorten our working week.
 - D. Enjoy our leisure time if our jobs allow us to.

1.3.3 Lecture 1

1. What is the main feature of niche tourism?
- A. It offers budget-friendly travel packages.
 - B. It focuses on popular tourist destinations.
 - C. **It provides opportunities for unique experiences.**
 - D. It specializes in historical and geographical sites.
2. Which types of niche travel experienced the biggest growth from 2018 to 2021?
- A. Adventure and wildlife trips.
 - B. Wellness and friendship trips.

- C. Low-risk and conventional trips.
 - D. **Cookery and eco-friendliness trips.**
3. What tip is offered for finding niche travel?
- A. **Consulting with a travel advisor.**
 - B. Following the advice of tourism analysts.
 - C. Doing thorough research through various sources.
 - D. Contacting an operator focusing on immersive vacations.
4. What does the lecture suggest about the future of niche travel?
- A. It will decline in popularity.
 - B. It will attract all age groups.
 - C. It will remain a niche market.
 - D. **It will become fairly mainstream.**

1.3.4 Lecture 2

1. What can we learn about the development of the term "forest bathing" from the lecture?
- A. **It first originated in Japan in the early 1980s.**
 - B. It was initially used to refer to swimming in forest ponds.
 - C. It was first used by people who did regular walking in nature.
 - D. It was coined by scientists studying the effects of nature on health.
2. How long does a person need to spend in nature each week to experience the benefits of forest bathing, according to one study?
- A. No more than 10 minutes.
 - B. No more than 20 minutes.
 - C. **At least 120 minutes.**
 - D. At least 250 minutes.
3. Besides the duration of time spent in nature, what is another factor that may contribute to the positive effects of forest bathing?

- A. Being exposed to new experiences.
 - B. **Experiencing feelings of awe in nature.**
 - C. Resolving personal problems and concerns.
 - D. Engaging in high-intensity physical exercise.
4. Which of the following statements is supported by scientific literature?
- A. **Forest bathing has powerful restorative effects.**
 - B. Forest bathing provides rather short-term benefits.
 - C. Forest bathing can be regarded as a kind of medical treatment.
 - D. Forest bathing becomes increasingly effective as time spent in nature increases.

1.4 Unit 4

1.4.1 Conversation

1. What are the speakers talking about?
 - A. **Potential choices for an art feature for their town.**
 - B. Some local cinemas hosting entertainment activities.
 - C. Job opportunities created by some new art projects in their area.
 - D. Proven benefits of having diverse art activities in the community.
2. What does the woman think of the cinema project?
 - A. It's her favorite because of its state-of-the-art technology.
 - B. It's her top choice because of its economic benefits for the town.
 - C. It's not an ideal project due to possibly limited use by young people.
 - D. **It's not the best choice for the town due to the high construction costs.**
3. What does the woman say about the botanical garden project?
 - A. It lacks an appealing variety of plants and birds.
 - B. It has a poor environment for immersive activities.
 - C. **It allows visitors to interact and connect with nature.**
 - D. It provides great educational opportunities for adults.
4. What will help lower the maintenance costs of the botanical garden?
 - A. **An irrigation system with the latest water conservation technology.**
 - B. An eco-friendly color for facilities to match the natural environment.
 - C. A volunteer group that builds a durable and self-sustaining irrigation system.
 - D. A building design that adopts the strictest maintenance standards for gardens.

1.4.2 Passage

1. What does the passage mainly discuss?
 - A. The process of painting the Mona Lisa.
 - B. **The reasons for the fame of the Mona Lisa.**

- C. The influence of the Mona Lisa on Italian art.
 - D. The techniques used in preserving the Mona Lisa.
2. Who is the person painted in the Mona Lisa?
- A. A woman who liked painting.
 - B. A woman who was a merchant.
 - C. **The wife of a wealthy merchant.**
 - D. The wife of a famous Italian artist.
3. What made it possible for the Mona Lisa to survive for centuries?
- A. The quality of the oil paints on the surface.
 - B. The texture of the frame holding the painting.
 - C. The type of canvas used to protect the wood frame.
 - D. **The use of a wood panel as the material to paint on.**
4. What do we learn about the painting style and techniques used in the Mona Lisa?
- A. The landscape was painted with a unique close-up view.
 - B. The subject's eyes and nose were painted with shadows.
 - C. Some brush marks were left in the background on purpose.
 - D. **The subject's hands and face were painted with great precision.**

1.4.3 Lecture 1

1. What is the main characteristic of representational art?
- A. It portrays clear and detailed views of the land.
 - B. **It depicts objects with great similarity to things in real life.**
 - C. It presents mythological scenes in historical real-world settings.
 - D. It avoids the representation of religious matters in sculptures and paintings.
2. What does the speaker say about the styles of representational art?
- A. **They have different degrees of abstraction now.**
 - B. They were once little known by the general public.

- C. They have gradually lost popularity in the modern era.
 - D. They do not favor abstract depiction of actual objects.
3. What is a distinctive feature of non-representational art?
- A. Simple shapes are often combined in a symmetrical way.
 - B. Artists use multiple lines and colors to depict real objects.
 - C. **Viewers can have different interpretations of a piece of work.**
 - D. Abstract objects are portrayed by the use of thick, straight lines.
4. What can be inferred from the lecture?
- A. How line patterns are used in a painting shows an artist's style.
 - B. What color a painting focuses on can have rich abstract meanings.
 - C. **People may sometimes disagree on the genre of a particular painting.**
 - D. The meaning of an artwork is determined by the genre under which it falls.

1.4.4 Lecture 2

1. What does the speaker say about John Denver's music?
- A. It was little known outside his home country.
 - B. It was popular for a very short period of time.
 - C. **It has received a large number of prizes and honors.**
 - D. It reflects the musical trends of the past four decades.
2. Why did John Denver choose to use "Denver" as part of his stage name?
- A. Denver was the name of his best friend in his earlier life.
 - B. **Denver is the name of the capital city of his favorite state.**
 - C. He wanted to get away from the music scene of Los Angeles.
 - D. He wanted to seek inspiration from the scenery of the Rocky Mountains.
3. What was the first important event that led to John Denver's fame in the music industry?
- A. He broke up with a band to perform his own songs.

- B. He joined a band to gain experience in songwriting.
 - C. **He was selected as lead singer for a popular folk band.**
 - D. He was asked to produce a solo album in his own style.
4. What contributed to John Denver's success in gaining a wide audience?
- A. **The use of elements from various musical genres.**
 - B. The emphasis on authentic folk music traditions.
 - C. Deep emotional connections with nature-loving audiences.
 - D. Simple short lyrics related to themes of goodness and love.

1.5 Unit 5

1.5.1 Conversation

1. Why does the man look upset?
 - A. He isn't satisfied with his team.
 - B. **He has too much work to complete.**
 - C. He has met someone he doesn't like.
 - D. He is afraid of his demanding manager.
2. How does the woman say she can help the man?
 - A. She can get more people to work on his team.
 - B. She can join his team to work for him herself.
 - C. **She can help him do his work in her free time.**
 - D. She can get his manager to reduce his workload.
3. What advice does the woman give to the man?
 - A. He should learn to deal with pressure.
 - B. **He should have confidence in himself.**
 - C. He should feel free to ask others for help.
 - D. He should accept more people into his team.
4. Why is the restaurant called 365?
 - A. It serves 365 different dishes.
 - B. It is open for business every day.
 - C. It is located at No. 365 on Sixth Street.
 - D. **It offers seasonal foods all year round.**

1.5.2 Passage

1. What prediction is made by the global organization mentioned in the passage?
 - A. Type II diabetes will become the most common kind of disease.
 - B. Diabetes rates among children and young people will be increasing.

- C. The issue of being overweight can hardly be solved in many countries.
- D. **Over half of the world's population could be overweight or obese by 2035.**
2. What are considered the primary causes of the growing issue of being overweight or obese?
- A. Genetic factors and the increase in age.
- B. Increased risks of disease and stress in life.
- C. **High-calorie foods and insufficient exercise.**
- D. High blood sugar and poor body composition.
3. Compared to men who were just overweight, how much higher is the risk of diabetes for men who were obese, according to one study?
- A. Three times higher.
- B. Four times higher.
- C. **Five and a half times higher.**
- D. Three and a half times higher.
4. What is the primary purpose of the passage?
- A. To give suggestions on how to maintain a healthy body weight.
- B. To present statistics on the global issue of overweight and obesity.
- C. **To explain the link between weight and the risk of diabetes in older adults.**
- D. To report how researchers studied the risk of diabetes in older people.

1.5.3 Lecture 1

1. What did the researchers of the new study find about the meaning of happiness?
- A. **It varies depending on geographical contexts.**
- B. It is influenced by a self-centered worldview.
- C. It can be strongly affected by people's lifestyle.
- D. It is primarily determined by personal success.

2. How have Eastern ideologies influenced the concept of happiness in East Asian cultures?
 - A. Happiness is conditional and varies from person to person.
 - B. Happiness is a process that connects everyone and everything.
 - C. **Happiness is closely linked to the quality of social relationships.**
 - D. Happiness is defined by one's adherence to traditional values.
3. In which countries did the happiness scale that emphasized independence prove to be most reliable according to the study?
 - A. In Asian countries.
 - B. In African countries.
 - C. In Central American countries.
 - D. **In Western European countries.**
4. What does the speaker intend to discuss in the lecture?
 - A. The measurements of happiness across different countries.
 - B. **The influence of cultural values on the concept of happiness.**
 - C. The difference between the Western and Eastern happiness scales.
 - D. The potential negative effects of a universal standard of happiness.

1.5.4 Lecture 2

1. How do we typically set conditions for our happiness according to the speaker?
 - A. By constantly changing our life goals.
 - B. **By waiting for the perfect time to be happy.**
 - C. By setting small goals for our everyday life.
 - D. By comparing our conditions to those of others.
2. Why does the speaker mention the study conducted by Harvard University?
 - A. To argue that happiness can be affected by various factors.
 - B. To provide a historical context for the science of happiness.

- C. **To support the view that happiness is significant to well-being.**
 - D. To promote the idea that happiness is a pleasant emotional state.
3. Why do some people fail to recognize happiness in everyday life?
- A. **They neglect to appreciate the small pleasures in life.**
 - B. They lack meaningful connections with people around them.
 - C. They focus too much on what they have experienced in the past.
 - D. They don't know what responsibilities to take to achieve happiness.
4. What does the speaker aim to convey about happiness?
- A. Happiness is the key to leading a fulfilling and meaningful life.
 - B. Happiness may not be a natural consequence of adult responsibilities.
 - C. Happiness can be genuinely achieved after one realizes their goals in life.
 - D. **Happiness is a choice that can be made despite challenging circumstances.**

1.6 Unit 6

1.6.1 Conversation

1. What is one of the reasons the man likes long novels?
 - A. The characters in long novels have complex problems to solve.
 - B. The characters in long novels face unexpected challenges in their lives.
 - C. The stories of long novels contain more innovative ideas than those of short novels.
 - D. **The stories of long novels are developed in greater depth than those of short novels.**
2. What does the woman think of short novels?
 - A. They can hardly tell complex stories.
 - B. They can be interpreted in a creative way.
 - C. **They can be as interesting as long novels.**
 - D. They have room for plenty of fun twists.
3. What did Hemingway do according to the conversation?
 - A. He condensed a long story into only several pages.
 - B. **He won a bet by writing a story in just several words.**
 - C. He published a large number of mini stories in magazines.
 - D. He wrote quite a few famous novels by recreating old legends.
4. What do we learn about the American magazine's mini-story project mentioned in the conversation?
 - A. The project lasted for just several months.
 - B. **The project has attracted a lot of participants.**
 - C. The project has received about 50,000 entries so far.
 - D. The project inspires the participants to read more books.

1.6.2 Passage

1. What does the program mentioned in the passage do?

- A. It sets the criteria for schoolchildren to pass reading exams.
 - B. **It helps schoolchildren overcome reading and writing problems.**
 - C. It trains teachers to improve their current instructional methods.
 - D. It studies the effects of literacy skills on students' success in school.
2. What is a characteristic of Reading Recovery?
- A. **Lessons are taught in an interactive way.**
 - B. Lessons last for an average period of 30 weeks.
 - C. Students need to monitor each other's reading behavior.
 - D. Students work in small groups to develop reading skills.
3. When will students stop taking Reading Recovery lessons?
- A. When they show good skills in assembling short stories.
 - B. When they have developed a consistent reading behavior.
 - C. **When they have reached the average reading level for their grade.**
 - D. When they demonstrate a high level of fluency in reading the alphabet.
4. What is mentioned in the passage as a disadvantage of Reading Recovery?
- A. The program is too short to have clear positive effects.
 - B. The lesson materials can be too difficult for some students.
 - C. The lessons demonstrate few long-term benefits for students.
 - D. **The costs of staff training are rather high for schools.**

1.6.3 Lecture 1

1. How can reading fiction affect our brains according to the speaker?
- A. It can strengthen our memory.
 - B. **It can improve our neural networks.**
 - C. It can reduce tension in some areas of the brain.
 - D. It can increase our ability to express complex feelings.
2. What is one of the activities we are engaged in while reading a novel according to the speaker?

- A. **Judging the meaning of literary texts.**
 - B. Evaluating real-life situations creatively.
 - C. Exploring links between complex stimuli.
 - D. Analyzing the background of the narrator.
3. What would the speaker most likely agree with regarding the effect of reading fiction?
- A. Reading fiction may cause a decrease in our mental flexibility.
 - B. Even reading just one fiction book brings clear cognitive changes.
 - C. Reading fiction may result in unrealistic imagination of the world.
 - D. **Reading fiction for a long period can make lasting changes in the brain.**
4. What does the passage mainly discuss?
- A. Typical images and emotions created in fiction books.
 - B. Mental skills commonly used to interpret literary texts.
 - C. **The cognitive and psychological benefits of reading novels.**
 - D. Basic skills to develop empathy for others through reading.

1.6.4 Lecture 2

1. What is a characteristic of Victorian literature?
- A. **The novel was the dominant genre.**
 - B. Styles created in previous eras were revived.
 - C. Gold mining was a common topic in fictional works.
 - D. Most writers were popular for just a short period of time.
2. What do we know about novels in the Victorian period?
- A. They were famous for advancing printing technology.
 - B. They were crucial for improving the population's literacy.
 - C. **They were often printed in separate parts over a period of time.**
 - D. They were often published in multiple formats to attract readers.

3. What might a Victorian novelist be most interested in writing about?
- A. Life changes in an abstract style.
 - B. The bold new era of technology.
 - C. **Individual struggles in everyday life.**
 - D. Romantic stories in a transforming society.
4. What contributed to the prosperity of children's literature in the Victorian period?
- A. The ever-increasing popularity of realistic literature.
 - B. A commercial focus on literacy programs for children.
 - C. **Social programs focusing on protecting children's rights.**
 - D. The rapid growth of a publishing market for young authors.

2 Banked Cloze

2.1 Unit 1

Banked Cloze

Cities are getting smarter every day, so are their transit options. One emerging option is autonomous vehicles (AVs), or simply cars with self-driving **capability**. However, as experts say, before we enter a reality where AVs are **embedded** into our daily lives, we will see the continued rise of electric vehicles (EVs) all over the world.

Besides saving costs for consumers, EVs can bring many **sustainability** benefits to the environment because they use electricity instead of gas to drive their wheels. Many large cities are trying to encourage the use of EVs by installing public charging stations throughout the city and **streamlining** the vehicle registration process. At the same time, many automakers are working to **enhance** the charging speed of EVs and to make EVs more **affordable**.

As the use of EVs rises, greater **demand** will be placed on the power industry. In some areas where energy resources are stressed already, the increasing use of EVs could well **disrupt** the electrical supply system.

EVs can also impact urban planning. Thus, consideration of commute options, location of charging stations, and open data should be part of a city's future mobility plans. It is important for automakers to partner with urban planners and utility companies to provide **optimal** experiences for consumers and residents. Imagine one day a driverless EV picks you up and drops you off, and then **proceeds** to the location of the next passenger without ever stopping to recharge because of wireless power transfer from nearby energy sources. The technology is on the way, but we need to wait for our cities and energy industry to get ready as well.

2.2 Unit 2

Banked Cloze

When I was young, I had a very narrow understanding of beauty. I used to **associate** it with only physical things. It was about what the eye could see: soft hair, clear skin, **stylish** clothes, a good figure ... I think some other people may also have gone through this phase of wanting the perfect shell defined solely in terms of **physical** standards.

When I first entered the modeling industry, I was always **striving** to conform to others' criteria of beauty. I would think, "Well, if they say I'm beautiful, then I am. But if they don't, then I'm not." Even today, I can't believe how **ridiculous** my thoughts were.

I want to correct this narrow idea that our beauty comes from the notions and approval of other people. When we allow others to determine what is beautiful, we fail to express and accept our individuality, our unique physical and personal **traits**. I think we should ask ourselves the question "What is beautiful to me?" and construct our own **concepts** of beauty that are more comprehensive and more meaningful.

As time goes on, I have gradually expanded my definitions of beauty, without limiting them to what lies on the outside. I have started to realize that physical beauty won't last forever because we humans are all **mortal** and will grow old inevitably. I have met many strong and courageous women, for example, a friend who **survived** breast cancer and a cousin who works hard to provide for her child. I have also met many women who are devoted to their careers. Their confidence radiates from their **dedication** to their professional pursuits. These women are examples of beautiful actions and thoughts. They embrace being themselves.

2.3 Unit 3

Banked Cloze

Welcome to our special edition "Building Better Businesses". As is well recognized, the business world is changing. For the new generation of entrepreneurs, setting up a Silicon Valley social media venture isn't their dream. Instead, their **priority** is clear: building a company that has a purpose at its heart. These founders speak with **clarity** that they want their companies to have a social or environmental impact as well as to make money. They want to play a role in their communities, **strike** a balance between work and private life, and invest for the long term rather than for quick profits.

At the same time, older people are becoming more active in entrepreneurship, too, as they find they still **harbor** the dream of setting up their own business and now have the confidence to take the risk. With people living longer and starting to seek more **accomplishments** in later life, this trend will surely continue to grow in the future. Plus, it is noted that older founders are more **motivated** to succeed in business than their younger counterparts (相对应者) because they believe they have more experience and wisdom.

Our special edition intends to help you build a better business, whether you are an ambitious individual who **aspires** to launch an independent company and strives to make a(n) **positive** impact on the world, or whether you are already a business owner and are looking for inspiration to **diversify** your services. Whatever your story, we hope you will find all the **ingenious** ideas, helpful tips, instructions, and insights you need in this guide. So, why not begin your exploration with us now?

2.4 Unit 4

Banked Cloze

Farming invariably interferes with the habitats of plants and animals. However, this does not necessarily mean that agriculture will put biodiversity in **jeopardy** and that the two can never come together. In fact, quite the opposite is true. Sustainable cultivation of agricultural land for food and animal feed enables us to **conserve** biodiversity.

Compared with the massive population growth in the last few decades, the expansion of arable (可耕的) land over the same period has been small. And there are limits to further expansion. A large **proportion** of the earth's surface like deserts is not suitable for crop cultivation, and other areas are **utilized** by humans for roads and buildings. Some land that is rich in biodiversity needs to be protected and thus should not be **converted** into arable land. The tropical rain forests, for example, have the highest species diversity in the world, and changing this land for crop cultivation would be **devastating** to the habitats and, indeed, the existence of the species in these places.

By 2050, global demand for food will have increased substantially. This is one of the **monumental** challenges facing agriculture today: How do we balance the rising demand for food and the need to maintain biological **integrity** and diversity, now and in the future?

Efficient and effective use of land will be **imperative** to the increase of food production and preservation of natural animal and plant habitats. Achieving this will depend, to a large extent, on the use of modern and **innovative** agricultural methods. If these methods are successfully developed, agriculture and biodiversity will be able to coexist in greater harmony.

2.5 Unit 5

Banked Cloze

Jack MacDonald, a Seattle man, left a fortune worth \$187.6 million to charity after living a frugal and humble life. The **donation** was the largest charitable gift in Washington State in 2013.

MacDonald struck people as a man without much money. He **clipped** coupons to save money on groceries, wore sweaters with holes, and took a bus to attend alumni luncheons. He once bought so many cans of frozen juice at a bargain price that he had to **purchase** a new freezer to hold them.

MacDonald left 40 percent of his fortune to Seattle Children's Research Institute to support a variety of **innovative** research in childhood diseases, although he had no **offspring** of his own. He was born in British Columbia, Canada, grew up in Seattle, and worked as a lawyer for three decades. He did not get married until he was in his 50s.

MacDonald made a huge fortune by investing in the stock market. After his parents died, he received a large family **inheritance**. He never thought about buying any luxuries although he had **enormous** wealth at his disposal. Material possessions weren't important to him.

MacDonald might have been eccentric in some ways, but he always acted on his **convictions** to do good with his wealth. Over the years, he contributed to hundreds of causes and organizations. He also sent anonymous gifts to a small town in Canada where his grandparents lived after they **immigrated** there from Scotland.

In July 2013, MacDonald was hospitalized due to a serious head injury that would eventually lead to his death. In the two months before he died, he insisted on using inexpensive ordinary drugs so that his treatment wouldn't **incur** additional costs. He once said he would like to be remembered as a philanthropist (慈善家). With his generosity and selflessness, surely he has been.

2.6 Unit 6

Banked Cloze

It's true that greenhouses consume resources, but making the correct choices when you design, build, and run your greenhouses can make your growing operation more sustainable.

Typical greenhouse operation consumes **lavish** amounts of plastic, from the plastic film covering on many greenhouses, to the plastic packaging of soil and fertilizers. Choosing recyclable materials, both in the **construction** of greenhouses and in their everyday operation, is one effective way to run sustainable greenhouses.

By their very nature, greenhouses are good at collecting energy from the **glittering** sun and using it to warm or heat their **interiors** to the appropriate temperature. Passive solar design, which doesn't use mechanical or electrical **apparatuses** but simply a building's own structure to capture and store solar energy, is usually most people's choice for their greenhouses. Meanwhile, allowing for adequate control of **ventilation** when you design greenhouses minimizes the need for electric fans and other energy-consuming cooling solutions. A good greenhouse design also considers the installation of thermal-banking system, a process that uses the sun to heat water and then **stores** the water underground, where it can be used to heat the greenhouse in cooler weather. Though the thermal-banking project sounds a little **intricate** due to the extra design and work it requires, it helps make the operation of the greenhouse more sustainable.

The operation of a greenhouse consumes energy and uses a lot of water as well. To **resolve** this problem, you can replace traditional lighting with more energy-efficient LED lighting, and build a rainwater collection and storage system. These methods can significantly **slash** energy and water costs though some more investments are needed at first.

3.1 Unit 1

课后翻译

城乡一体化 (urban-rural integration) 是我国现代化和城市化发展的一个新阶段。其目的是通过对城乡发展进行统筹规划, 并通过体制改革和政策调整, 破除城乡二元经济结构 (the urban-rural dual economic structure), 从而实现城乡在政策上平等、在产业发展模式上互补, 让农村居民享受到与城镇居民同样的文明和福利。只有大力推进城乡一体化, 我国整个城乡经济才能实现全面、可持续发展。

One Possible Version

Urban-rural integration marks a new stage in my country's modernization and urbanization. Its objective is to dismantle the dual urban-rural economic structure—through comprehensive planning of urban and rural development, as well as through institutional reform and policy adjustments—thereby achieving policy parity between urban and rural areas and fostering complementary industrial development models. Ultimately, this aims to ensure that rural residents enjoy the same standards of civilization and social welfare as their urban counterparts. Only by vigorously advancing urban-rural integration can my country's entire urban and rural economy achieve comprehensive and sustainable development.

3.2 Unit 2

水墨画 (ink wash painting) 是中国传统艺术形式之一, 是中国国画 (traditional Chinese painting) 的代表。它大约始于唐代, 兴盛 (prosper) 于宋代和元代。在其一千多年的历史中, 水墨画经历了不断的发展、提高和完善。水墨画的主要创作工具和材料有毛笔、宣纸 (rice paper) 和墨, 作品的艺术特点也与此紧密相关。水墨画在中国绘画史上具有很高的地位, 甚至被认为是衡量东方绘画艺术水平的标准。

One Possible Version

Ink wash painting is one of the traditional art forms of China and serves as a quintessential representative of traditional Chinese painting. It originated approximately

during the Tang Dynasty and flourished throughout the Song and Yuan Dynasties. Over the course of its history—spanning more than a thousand years—ink wash painting has undergone continuous development, refinement, and perfection. The primary tools and materials used in its creation include the brush, Xuan paper (rice paper), and ink; consequently, the artistic characteristics of these works are inextricably linked to these very elements. Ink wash painting occupies a highly esteemed position in the history of Chinese art and is even regarded as a benchmark for evaluating the artistic caliber of Eastern painting.

3.3 Unit 3

课后翻译

随着社会和经济的飞速发展，中国在国际舞台上发挥着越来越大的作用。在此背景下，我们必须坚守中华文化立场，加快构建中国话语和中国叙事体系（China's discourse and narrative systems），讲好中国故事、传播好中国声音，展现可信、可爱、可敬的中国形象。加强国际传播能力建设，全面提升国际传播效能，形成同我国综合国力和国际地位相匹配（be commensurate with）的国际话语权。深化文明交流互鉴，推动中华文化更好走向世界。

One Possible Version

Amidst rapid social and economic development, China is playing an increasingly prominent role on the international stage. Against this backdrop, we must steadfastly uphold the stance of Chinese culture and accelerate the construction of China's discourse and narrative systems. We must tell China's story well and effectively convey its voice, thereby presenting a credible, amiable, and respectable image of the country. We must strengthen our capacity for international communication, comprehensively enhance its effectiveness, and establish an international voice commensurate with our comprehensive national strength and global standing. Furthermore, we must deepen exchanges and mutual learning among civilizations, thereby facilitating the broader global reach of Chinese culture.

3.4 Unit 4

课后翻译

改革开放以来,中国政府采取了一系列改善生态环境、保护生物多样性的措施。许多重点生态工程得到推进或实施,一大批自然保护区(nature reserve)、生态示范区(ecological demonstration zone)和森林公园先后被设立。今后,我们还需要进一步提升生态系统的多样性、稳定性、持续性,牢固树立和践行绿水青山就是金山银山的理念,站在人与自然和谐共生的高度谋划发展。

One Possible Version

Since the launch of the Reform and Opening-up policy, the Chinese government has adopted a series of measures to improve the ecological environment and conserve biodiversity. Numerous key ecological projects have been advanced or implemented, and a large number of nature reserves, ecological demonstration zones, and forest parks have been established in succession. Moving forward, we must continue to enhance the diversity, stability, and sustainability of our ecosystems; firmly uphold and put into practice the philosophy that "lucid waters and lush mountains are invaluable assets"; and plan our development from the perspective of harmonious coexistence between humanity and nature.

3.5 Unit 5

课后翻译

中国载人航天工程(manned space program)于1992年开始实施,迄今已取得了巨大成就。2003年,“神舟五号”载人飞船(manned spacecraft)成功发射,使中国成为世界上继俄罗斯和美国之后第三个有能力独自将人送上太空的国家。2005年至今,中国又完成了多次神舟飞船载人发射。此外,通过研发空间实验室和无人货运飞船(unmanned cargo spacecraft),不断推动空间站建设,中国具备了长期开展在轨科学实验和综合开发利用太空资源的能力。

One Possible Version

China's Manned Space Program was initiated in 1992 and has since achieved tremendous success. In 2003, the successful launch of the Shenzhou-5 manned spacecraft made China the third nation in the world—following Russia and the United States—capable of independently sending humans into space. Since 2005, China has successfully conducted

numerous additional manned missions using the Shenzhou spacecraft series. Furthermore, through the development of space laboratories and unmanned cargo spacecraft—thereby continuously advancing the construction of its space station—China has acquired the capability to conduct long-term scientific experiments in orbit and to comprehensively develop and utilize space resources.

博鳌亚洲论坛（Boao Forum for Asia, or BFA）是一个总部设在中国海南省博鳌镇的国际组织。它由 29 个成员国共同发起，于 2001 年正式成立。论坛每年定期在博鳌举行会议，目前已成为亚洲以及其他洲政界、工商界和学术界领袖商讨亚洲及全球关键问题的高层次对话平台（high-level dialogue platform）。在新的历史时期，博鳌亚洲论坛将继续为亚洲及世界和平、繁荣与可持续发展做出积极贡献。

One Possible Version

The Boao Forum for Asia (BFA) is an international organization headquartered in Boao, Hainan Province, China. Jointly initiated by 29 member states, it was officially established in 2001. The Forum holds regular annual meetings in Boao and has evolved into a high-level dialogue platform where leaders from the political, business, and academic spheres—spanning Asia and other continents—convene to discuss key regional and global issues. In this new historical era, the Boao Forum for Asia will continue to make positive contributions to peace, prosperity, and sustainable development in Asia and the world.
